## Insert Column

Posted by blondie63 - 2014/08/31 00:47

---

I've no found a way to insert a new column :(  
Really it's not possible ?  
Also a move column is a missing feature..

Hello,

Do you show data from a database?

---

The extension shows column in order which is defined in "SELECT" SQL query. Just add a column to the query and it will be shown into the table.

i try to explain you with a sample:

my query: select a,b,c,d,e,f,g from my table  
in ARI Data Tables module i set this column:

0 = a  
1 = c  
2 = d  
3 = f  
4 = g

i forgot columns b & e ! now i cannot insert one column between 0 & 1  
i need to rewrite all ARI Data Tables columns setting..  
do you agree?  
best regards

Mauro

---

It is possible to use column names instead of column indexes in "Columns settings -> ID" parameter.

ok, so if i need to move columns position i can change the select..  
good !

thanks
