

HTML table OK, Ari Data Table KO

Posted by blondie63 - 2014/08/31 16:40

I've a module instance with my custom select and with table type = html
All working fine

Now i choose Ari Data Table as table type and untouch my custom select, the frontend page crash with this error:

ERROR: 1064

You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'LIMIT 0,1' at line 18 SQL=SELECT `taf1r\_ticketmaster\_orders`.`ordercode` ,

LEFT JOIN `JM\_vsp`.`taf1r\_ticketmaster\_tickets`
ON (`taf1r\_ticketmaster\_orders`.`ticketid` = `taf1r\_ticketmaster\_tickets`.`ticketid`);

what's wrong ?

thanks for help

ok, without symbol ; the page display an empty grid :(

i've tried table type = ARI Tiny Table and work fine but without pagination, i always see all records..

If "Server side pagination" parameter is enabled, try to disable it.

with server side pagination = NO :

table type = ARI Tiny Table -> i see records but without pagination
table type = ARI Data Table -> i see records but without pagination

:(

Are you sure this latest version it JM 3.3.3 compatible ?

The extension is compatible with J! 1.5, 1.6, 1.7, 2.5 and 3.x including the latest 3.3.3 version.

Could you send a link to a page where we can see the problem and screenshot(s) of module settings page by email?
