
column transform

Posted by blondie63 - 2014/09/01 10:47

i've a select with some numeric value (0,1,2) and need to show a string to user:

0=unpaid
1=pending
2=paid

Can i do this with ARI Data Tables?

Thanks for help

Hello,

You can use CASE operator in "SELECT" SQL query for this purpose.

Regards,
ARI Soft
