
Tables not working

Posted by WhatsMyTime - 2014/09/04 18:30

Hello

I have downloaded and installed ARI Data Tables for displaying race results in a nicer way than just plain HTML table.

I managed to get it to work for a short time before the sort on the ARI Data Table stopped sorting the results properly. I can only get ARI Tiny Table to work and this doesn't do it very well.

Results Page

Any help to point me in the right direction would be very much appreciated.

Hello,

Could you provide a link to a page where we can see the problem with "ARI Data Table" widget (when "Choose table type" parameter is set to "ARI Data Table")?

Regards,
ARI Soft

Just noticed that I hadn't selected JQuery Ui Themes. Now selected.

It seems this problem with javascript and CSS files optimizer extension which is used on your site. It doesn't load jQuery library. Try to set "Load jQuery method" parameter to "Local copy" in module settings and clean Joomla! cache. If it

doesn't help, could you provide a temporary access to your J! backend by email so we can investigate the problem more deeply?

Regards,
ARI Soft

Re:Tables not working

Posted by WhatsMyTime - 2014/09/05 12:20

Hello

I found a setting for JQuery on the Template settings that was not selected.

Data Tables now looking so much better (sorry about that)

Link to results page below.

Results Page

But now have more questions.

In the results page the following columns sort in ascending / descending order by clicking the heading

Place, Name, bib No.,Gender Place,Gender,Category Place, Category, Swim Time, T1 Time,Bike Time, T2 Time and Club. These all work perfectly.

Swim Time, T1 Time, Bike Time, T2 Time, Run Time, Chip Time are not sorting into ascending or descending order very well.

Also is there any way of fine tuning the search function ? (i.e. when searching M (male) only we are getting F (female) results as well)

Many Thanks
WMT

Values in "Show Time", "T1 Time" and etc. have specific format and it requires to create a custom sorter to sort them properly (not as string or number).

Regards,
ARI Soft

Many thanks for the help.

Have another question for you.

How do I add in 2 new items to my page.

Item 1) Cell borders

Item 2) Mouse hover

Many Thanks

WMT

The link is not working.

Could you also provide an image where we can see what do you want to achieve?

Regards,
ARI Soft

Re:Tables not working

Posted by admin - 2014/09/10 19:09

1. Add the following code to "CSS Styles" parameter:

```
{ $id } TH, { $id } TD {border-width: 1px !important;border-color: white !important;border-style: solid;}
```

2. Use the following code in "CSS Styles" parameter:

```
{ $id } TR:hover TD {background-color: green;}
```

Regards,
ARI Soft

Hello

Have inputed the above code but this does not seem to have made any difference.

Bit puzzled now.

Link to web page that I added the code to.

Web page with new code.

many thanks

WMT

Re:Tables not working

Posted by admin - 2014/09/10 20:58

The page doesn't contain code from our previous post. Try to clean Joomla! cache.

Regards,

ARI Soft

Re:Tables not working

Posted by WhatsMyTime - 2014/09/10 21:33

Have cleared caches as far as I know how to do it.

Still not working on the webpage.

What can be done next ?

Re:Tables not working

Posted by admin - 2014/09/11 05:08

The page doesn't contain CSS rules which we provided. We can investigate this issue in more details if you provide a temporary access to your J! backend by email.

Regards,

ARI Soft

Re:Tables not working

Email sent with login details.

Re:Tables not working

Posted by admin - 2014/09/11 11:59

Try now. The code was not added to "CSS Styles" parameter in module settings.

Regards,
ARI Soft

Many Thanks

Weird that it never worked on the first page that I tried.

Congrats on a great product. :cheer:
