
SQL returns integer, PIE show Decimals

Posted by johnny@ejs.dk - 2014/09/11 22:14

Dear Sirs

My MSSQL SELECT returns INTEGER values but there is decimals (235,00) in the Pie and bar charts.

Using Ari Data Tables.

Exsample show PIE where KS is 0.2% but actually KS i largest with 2436 not 2.436

Any formatting options?

Sincerely Johnny Ejs http://www.ari-soft.com/images/fbfiles/images/pie_1.png

Hello,

Could you send a link to a page where the problem occurs?

Regards,
ARI Soft

Unfortunately is my site behind corporate firewall.

I can supply that the data is verified as integer and my problem not nessesary is a problem in the Ari Data Table module. Perhaps this i due to Joomla and localisation. The way that we handle numbers e.t.c.

Anyway if You have any suggestions I appreciate.

Sincerely
Johnny Ejs <http://www.ari-soft.com/images/fbfiles/images/Udklip.PNG>

Try to show data in HTML table (set "Choose table type" parameter to "HTML table").

You can see in the table that it retrieves 2.349,0 from database (not 2349).

PS: Do you use "Columns settings -> Format" parameter in module settings?

Regards,
ARI Soft

I disagree
I am convinced, that my MSSQL returns ingeter.

Where can i learn about formatting parameters? http://www.ari-soft.com/images/fbfiles/images/Udklip_3.PNG

Not using any formatting parameters.

Sincerely
Johnny Ejs http://www.ari-soft.com/images/fbfiles/images/Udklip_4.PNG

The extension can modify data only if "Format" parameter is defined otherwise data is modified outside the extension.
We need to see the problem and have access to backend so we can investigate it because we can't reproduce it on our test server.

Re:SQL returns integer, PIE show Decimals

Solved!
And You were right again.

This modification to Query fixed my problem:

```
SELECT      Dep.a as Forv
            ,cast((SELECT COUNT(*) FROM dbo.HPD_Help_Desk with (nolock) WHERE  = 'Change' AND  like '%Normal%'
AND  = Dep.a) as varchar(250)) as Normal
            FROM (SELECT 'BIF' a union all SELECT 'BUF' a union all SELECT 'KFF' a union all SELECT 'KS' a
union all SELECT 'SUF' a union all SELECT 'SOF' a union all SELECT 'TMF' a ) as Dep
```

```
union all
SELECT      N'Ã~KF' as Forv
            ,cast((SELECT COUNT(*) FROM dbo.HPD_Help_Desk with (nolock) WHERE  = 'Change' AND  like '%Normal%'
AND  like '%KF') as varchar(250)) as Normal
```

So this issue can be closed.

Sincerely - Johnny Ejs <http://www.ari-soft.com/images/fbfiles/images/Udklip-7565fe025787badde23dcf4b1f0c3b4e.PNG>
