
Just purchased and ARI data tables has broken menu

Posted by jennyhowe@blueyonder.co.u - 2014/09/15 17:23

Hello,
I have just purchased ARI dta tables and I thought it was all working fine. But I have just realised that my template dropdown menu has stopped working. Can you tell me how to get it working again and whether this module is compatible with my Vertex template?
Many thanks
Jenny

Hello,

Is it possible to see the problem anywhere? It can be a javascript conflict.

Regards,
ARI Soft

Yes you can see on this page that the arrows have disappeared from the dropdown menu's.

<http://test.ptaholytrinityschool.org.uk/index.php/parent-zone/school-clubs>

If you click on home thet reappear again.

Set "Load jQuery method" parameter to "Local copy" in module settings.
