
Hide Column does not work

Posted by johnny@ejs.dk - 2014/09/23 13:48

Dear Sirs

I want to hide one Column from my table but the Data Table still shows the Column.

Is there something other than YES to hide that I should be aware of?

Sincerely

Hello,

"Columns settings -> Hidden" parameter should work. Could you send screenshot(s) of page with settings by email and send a link to a page where we can see the table?

Regards,
