CSV size limit

Posted by WhatsMyTime - 2014/09/29 16:45

_____

Hello

Is there size limit on the CSV files?

I imported a CSV file that was 11 columns by 1500 rows and it would not display.

When I cut it down to 11 columns by 1000 rows it displayed ok.

Tried it at 11 columns by 1100 rows and it would display ok.

Tried it at 11 columns by 1200 rows and it would not display.

How can I work round this?

We are using Data Tables.

Link to test page.

many thanks
WMT

_____

Hello,

It depends on value of "memory_limit" PHP parameter.

_____

In PHP config file. You can see value of this parameter on "System -> System Information -> PHP Information" page on Joomla! backend.

_____

Ok found it and it is set to 24M in Local and Master Value.

What should be the setting, and how do I change it?

_____

You can try to use PHP Settings plugin or contact hosting support and ask them to increase value of the parameter.

_____

The plugin seems to have worked its magic.

I have a larger file to import so will test with this.

Another question.

How can I change the font color of the Pages buttons (First, Previous, Next, Last) Very dark and easy to miss?

_____

This problem with the following CSS rule which is defined in site template styles:

.paging_full_numbers .ui-button {
    color: #333 !important;
}

You can add the following CSS rules to "CSS Styles" parameter in module settings to fix it:

.ari-data-tables .paging_full_numbers .ui-button {
    color: #eee !important;
}

Regards,
ARI Soft
