
Unable to display more than 1500 records

Posted by vaibhavsagi - 2014/10/21 13:46

Hi Team,

I want to display about 5000 records from sql table using data tables. However, I get following error while displaying many records at once.

Can you please let me know how can I display 5000 records. I tried using paging, but I think server side paging does not work.

I will appreciate a quick response as the site is live already!

Thank you!

Regards
Vaibhav

Hello,

Where we can see the problem with server side pagination?

You can see the issue here : http://www.kysmumbai.in/index.php?option=com_content&view=article&id=64

Let me know if you need any other information. If you need admin login, how can I share it?

Set "SQL -> Debug" parameter to "No" in module settings.

Works like a charm!!!

Thank you so much :)
