
Data Table > No Data Available

Posted by jptarry - 2014/10/22 18:25

im using the Data table it shows the initial table with 10 entries
when i click on Next or Prev nothing happens (there are about 38 entries) so the pagination isnt working

and when you click on "Expense" to sort the entries it shows "No data available in table"

am i missing a setting?

Hello,

Could you send screenshot(s) of module settings page by email?

Regards,
ARI Soft

The screenshot doesn't contain the SQL query which you use.

Remove "ORDER BY" clause from the query or set "Server side pagination" parameter to "No" in module settings.
