
{ \$columns: \"columnname\" } is not replaced when...

Posted by adeshjohnson1 - 2014/11/05 20:03

Hello:

{ \$columns: \"columnname\" } is not replaced when \"columnname\" value is NULL, and the table shows exactly { \$columns: \"columnname\" } instead of nothing - which is I expected.

Hello,

Download and upgrade the module please.

Regards
ARI Soft
