trouble showing line chart

Posted by Thermike - 2014/11/16 18:06
_____

Hi,
I 'm trying to show a line chart, out of a mysql query. There are 2 values selected, for x axis I have rectime and for y axis some numbers. The query is succesful but for some reason I can't get to show the line on the page. It brings only the recorded time like that:

Last Hour Details
rectime 2014-11-16 19:55:50 2014-11-16 19:56:01 2014-11-16 19:56:11 2014-11-16 19:53:58

Table type is ARIGchart, Type is line chart, source type is SQL, revert data is Y, x axis is rectime (as in sql select) and y axis is cpm (again as in sql query)

Any ideas?,

Bregards,
thermike

Hello,

Could you specify what SQL query you use, send an SQL dump of the DB table which is used in the query and screenshot(s) of module settings page by email so we can investigate the problem or send a link to a page where you use the module and a temporary access to your J! backend?

Regards,
ARI Soft
