System - ARI Data Tables

Posted by hardik - 2014/12/04 09:29
_____

Hi there,

 I have installed this the whole set of ARI Data Tables module, I cant find the plugin called System - ARI Data Tables after the installation, Plus i want to know if i have not create the css for table class and row class whilst I want to add this filter to my tab section in the table of my website www.onlinegamblingsa.com. Its displaying error "No data available." Please assist me

Thanks

I have checked the email thanks, still its displaying the following error:

"No data available."

Why, what can be the reason?

_____

It didn't work because "Content - ARI Data Tables" plugin was used instead of "System - ARI Data Tables" plugin.

Support team wrote use "System - ARI Data Tables" instead of "Content - ARI Data Tables" plugin. The original response was:

Find "System - ARI Data Tables" plugin in attach. Use it instead of "Content - ARI Data Tables" plugin. It supports ability to convert plain HTML tables to table widgets.
