
Error! Could not find an XML setup file in the pac

Posted by cleewilli - 2010/07/03 14:42

When I attempted to install ARI Data Tables using Joomla Version 1.5.17 the error message "Error! Could not find an XML setup file in the pac" was returned. What can I do to correct this error. My altimate goal is to embed tables and (or) charts into selected acticles. !!Help!!

Hello,

It seems you haven't unzipped aridatatables_unzip_first.zip archive. This archive contains readme.txt file which contains instructions how to install the module and the plugin. In brief, unzip aridatatables_unzip_first.zip archive and use mod_aridatatables.zip for installation the module.

Regards,
ARI Soft
