
SQL Statement involved current userid

Posted by ferdigerungan - 2014/12/30 07:07

Dear Support,

I would like to get some data regarding the current user id logged in and use below statement:

```
SELECT id_profile, loginid_mt4, type FROM relational_keys WHERE id_profile={$REQUEST:UserId}
```

and got error 1064... would u help me to correct my SQL statement?

Thanks

Hello,

Use the following query:

```
SELECT
  id_profile,
  loginid_mt4,
  type
FROM
  relational_keys
WHERE
  id_profile={$UserId}
```

Thks its works well... but i have another problem... can we JOIN 2 databases in 1 SQL statement in ARI DATA TABLE?
because i really need this feature... please help
