
Sorting Bug

Posted by toadie - 2015/01/12 20:14

I have found two bugs.

1. Max 100 items visible although 200 is set
2. Sorting is not correct.

example:

1.25
10.0
15.0
2.50
24.0

It would be correct:

1.25
2.50
10.0
15.0
24.0

Hello,

Send your order number by email and a link to a page where the problem occurs.

Regards,
ARI Soft

Set "Choose table type -> ARI Data Table -> Columns settings -> Column index" to 4 and "Choose table type -> ARI Data Table -> Columns settings -> Numeric HTML" value.

Thank you for the reply.

Unfortunately, the module was defective which this has been migrated wrong. After I installed the ACL manager could

this error be corrected. Nevertheless, there is a problem, I can not save the module. He also no error. The question is what can I do? Module I have already re-installed, but has brought nothing.

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
