Format dates from CSV file
Posted by Cablecutter - 2015/01/18 10:12
_____

How can I use the Format field in Columns Settings if the data is coming from a CSV file.
I have in the first column a date in the format 18-01-2015 and want to display this date in the format 18-jan.

Hello,

Set "Columns settings -> ID" parameter to 0 value and "Columns settings -> Format" parameter:

{$value|date_format:d-M}

Regards,
ARI Soft

_____

Every row in the table is displayed as "d-M" and not the value of that row.

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email?
