
Hide Empty cells on a CSV file

Posted by Villasante - 2015/01/26 15:41

Hi there,

I wonder if there is a way of hiding cells with no value on a table.

In this table you can see a customer that has started working with us on that specific quarter. The idea is to hide all the columns with nothing on it. (Highlighted)

Thanks for your help,

Hello,

The extension doesn't support this ability.

Thanks for your answer...

Do you have any other product that support this ability?

If yes, i would purchase straight away... if not, do you know any product from any other developer, that can do this???

Thanks so much,

Manu

Hi There,

I would like to remove the empty cells, until the first cell with data on.

for example, if a customer start working with us in the fourth Quarter, the report would look like...

--Q1 -----Q2 -----Q3 -----Q4
EMPTY EMPTY EMPTY 10.45

So would like the table to start at the Q4

Is it somehow possible??

Thanks

It can be implemented as a custom feature for "ARI Data Tables". We can discuss details by email.
