
Table not sortable

Posted by Jimmy R - 2015/02/06 10:25

Hello,

I noticed the table at this location - <https://www.stockpinger.com/stocks-and-shares-daily-weekly-data-lists/fca-short-positions-holders-and-issuers> - is not showing sorting and style with the displayed data

If I change the .csv file it does

Why is this please?

Hello,

It seems an non existing column is used in "Choose table type -> ARI Data Table -> Columns settings" parameter section. See "Column index" parameter and change 4 to 3 (zero-based index is used for columns).

Regards,
ARI Soft

Still have the problem, have even created a new ARI Data Table module

Set "CSV -> Strict mode" parameter to "Yes" in module settings or fix your CSV file. Some rows contain 4 columns, but others contain 5 columns.

Regards,
ARI Soft
