
Header Row Numbers 0 1 2 change

Posted by cjmicro - 2015/02/20 22:59

when i use ari data table widget the header row has numbers in each column 0 1 2 3 4 5 6 (one for each column).

http://www.retiredracehorseproject.org/index.php?option=com_content&view=article&id=1000

I want to be able to sort columns but do not want those numbers, would rather have my column headers title not numbers.

If I have it set to not show header, it also does not show style, it reverts back to just a plain layout (no colored rows).

How can i have the header row be my column headers? I am using csv file to load the data. Column headers ARE listed in the csv.

Cheryl

Hello,

Set "Choose source type -> CSV -> Heading" parameter to "Yes" and "HTML table settings -> Show header" parameter to "Yes".

Regards,
ARI Soft
