

Link to a File
Posted by mike_dcx - 2015/03/03 18:20

Hi.

I try to show in a table the results of diferentes courses, and i want to show a link for review that results (in a xls)

I have in my table a field named: "file_name" whit the name of the xls.

And i want to show something like this:

Name course	Start Date	End Date	View Results
Course A	2015-03-01	2015-03-02	"Link to file CourseA.xls"
Cousre B	---	---	"Link to file CourseB.xls"

I have use in the Columns Settings the next:

See Results

But i don't want to see the column "file_name" in my table....

Can somebody help me.!!

Thanks.

Hello,

Set "Columns settings -> ID" parameter to file_name value and "Columns settings -> Format" parameter to the following value:

See Results

You can also use "Columns settings -> Alias" parameter to rename column.

Regards,
ARI Soft
