
How to use bootstrap DataTables integration?

Posted by zanzibar - 2015/03/04 14:18

Hi there,

Is it possible to use the DataTables Bootstrap integration or have that as an option? I don't need the jQuery UI stuff and would prefer to use Bootstrap so it matches my other tables. I've tried setting the table classes to Bootstrap's "table" but the jQuery UI seems to override it, and there does not appear to be a way to say "No jQuery UI theme" (if that's even possible or needed).

I know DataTables has the Bootstrap integration CSS and JS available but am not sure how to specify.

Hello,

Currently the extension doesn't support integration with bootstrap styles.

Set "Theme" parameter to "- None Selected -" in "ARI Smart Content - Data Table" module settings if don't want to use a jQuery UI theme.

Regards,
ARI Soft
