CSV files
Posted by Svenne - 2015/03/25 10:45
_____

We play poker and all results will be uploaded as csv files and I have created a module for each table (csv) it is possible to put all the tables together so it is a ranking of all csv files in a folder.

Hello,

The extension doesn't support ability to create tables for all CSV files from the selected folder(s), but it is possible to create a custom PHP code and use it in an article for example ("DirectPHP" plugin can be used for this purpose). It will create tables for all CSV files using "ARI Data Tables" module.

PS: We can do it as a custom development.

Regards,
ARI Soft
