
Show Header and Footer

Posted by kefford - 2015/03/29 04:28

Hi,

This should be another very quick question, and I am sure this will prove obvious. The ARI DataTables module has settings for Show Header and Show Footer, both with Yes/No selection. Where is the Header and Footer set?

Ken

Hello,

If these parameters are enabled, header/footer rows with column names will be shown.

Regards,
ARI Soft
