## Setting the path of the CSV file from webhosting c

Posted by kmendis - 2015/04/13 12:26

---

Hi

I am trying to display data from a CSV file uploaded to my webhosting directory using cPanel

will give the path as it is

public\_html/kmendis.org/aridata/xxxxx.csv

not sure this works as it is not in the joomla directory  
do I need to have the csv file in the joomla directory?  
can the above work/

thanks  
Kumara

Hello,

If file is located in /aridata folder then populate "CSV -> Path to CSV file" parameter with the following value:

aridata/xxxx.csv

Regards,  
ARI Soft
