
Is there a way to put a row number next to data ?

Posted by spitfire - 2015/04/23 09:35

When I resort the table I would like a row number to be inserted.
So after any sort of the columns it would still return.

1 data4
2 data1
3 data3
4 data2

sorted.

1 data1
2 data2
3 data3
4 data4

I just need a fixed number on the rows .. is there a way I can do this ?

It requires custom modification of the extension (modify a javascript code).
