Forbidden Error with Query who contains where

Posted by roemi - 2015/04/26 15:32

_____

Hello

I need your help. I can't find the Problem. I bought your ARI Smart Content DataTable extension.

I can run simple querys for example Select * from Somewhere. But when I have a where condition then I got a Forbidden Error from the website and after 5 tries im blocked for 30minutes.

I attached two pictures. One you can see the error, second you can see the Query (I got from your website) I also tried a lot of querys who are working in PhPMySQL oder HeidiSQL software.

I have no Idea what can be the problem. http://www.ari-soft.com/images/fbfiles/images/error-391f7e079ab745f26eb55b2a3f1534bc.jpg

_____

Hello,

It can be a problem with configuration of mod_security Apache module (you can contact hosting support and ask that they check it).

Regards,
ARI Soft
