
Row Format

Posted by kefford - 2015/05/08 05:10

Hi,

A few of my tables are displaying with alternating color (blue/white) from row to row. This looks quite nice. How do I set other tables to display the same alternating row color? I know this will be easy for you.

I have tried both "HTML table" and "ARI Data Table" settings for the table setting.

Thanks in advance.

Ken

Hello,

Could you send a link to a page with a table which you want to modify?

Regards,
ARI Soft
