
Ari data tables not visible in internet explorer11

Posted by varnenka - 2015/05/18 11:31

Hello,
We mentioned, that ari data table not visible in browser internet explorer 11, visible is only header of table with header tags. That's why many people called us that they not see the table.
There is no problem in chrome browser, and in mozilla everything is fine. But IE still is most popular browser. Here is a link of one of tables, the others tables are a part of sliding menu - with the same problem.
<http://agup.varna.bg/index.php/registers/2013-04-23-07-00-18/razresheniya-za-stroezh-2014-g-na-agup>

Could you please tell us what is the problem, and is there a solution of it.
We are waiting an answer as soon as possible.
Best regards.

Hello,

Upgrade the extension to the latest version and clean browser's cache.

Regards,
ARI Soft
