
Display result SQL ARI Data Tables 3 joomla

Posted by kaddour - 2015/06/24 12:21

sorry I do not speak English

After installing artidatatable joomla3, I did the setup on the video com.

I use an external database

this only works if the position is filled as 1,2,3,4

you have a solution

thank you <http://www.ari-soft.com/images/fbfiles/files/img.zip>

Hello,

Could you explain in more details what problem do you have? Probably provide image(s) where we can see what's wrong?

Regards,
ARI Soft

Hello,

the problem is the result of the SQL query is displayed only if the module position is filled

Position = "none" does not work http://www.ari-soft.com/images/fbfiles/files/probleme_aridatbase2.zip

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

Hello,

the site is not accessible from the outside

but I can give you direct access with TeamViewer on my computer

give me an email address

TeamViewer version 9

thank you

The archive from your previous post is broken so we can't see files from it. You can't load "ARI Data Tables" module instance into an article with help of "Content - ARI Data Tables" plugin if the module is enabled and position is set to "None"?

Regards,
ARI Soft

Check that "Content - ARI Data Tables" plugin is enabled. If it doesn't help, try to load the module via "Content - Load Module" standard Joomla! plugin (you can read how to use it here) or via 3rd party plugin like Module Plant.

Regards,
ARI Soft

hello,
I install the plugin "Module Plant" it works fine
thank you for your help
