search window and download buttons not showing.

Posted by ataylor14 - 2015/07/16 10:03

_____

Hello
I am using Ari Data Table and the search windows and download buttons do not appear. Also the tyable headings are not clickable e.g., to sort.
What can cause this problem. On a local Joomla 3.1 installation these features work well.

Thank you
Kind regards
Amelia

_____

Hello,

Is it possible to see the problem anywhere?

Regards,
ARI Soft

_____

I have fixed it by using the local jQuery library rather than the Google one.
Thank you.
