
using 2 different sql tables

Posted by rastemserie - 2015/07/21 08:21

How do i place this in a table

```
SELECT
created_on,
order_item_sku,
order_item_name,
product_quantity,
product_item_price
FROM
jos_virtuemart_order_items
```

```
SELECT
product_s_desc
FROM
jos_virtuemart_products_es_es
```

=====

Hello,

Use JOIN construction:

```
SELECT
    OI.created_on,
    OI.order_item_sku,
    OI.order_item_name,
    OI.product_quantity,
    OI.product_item_price,
    P.product_s_desc
FROM
    jos_virtuemart_order_items OI LEFT JOIN jos_virtuemart_products_es_es P
    ON OI.virtuemart_product_id = P.virtuemart_product_id
```

Regards,
ARI Soft
