
Ari Datatable no data

Posted by denfung - 2015/07/22 14:16

Hi,

I am new to Ari-Data.

I am not able to get table with alias to work simple SQL below.

```
SELECT pp.name, pp.username FROM jos_users pp LIMIT 10;
```

If I remove the alias (pp), it works. Any idea?

I would like to do Join, hence table alias is required.

Thanks,
Dennis

Hello,

Check that you use the latest version of the extension and if it doesn't help could you send a link to a page where the problem occurs?

Regards,
ARI Soft

Can I send the link privately?

Dennis
