when i use the following SQL syntax i get my table to display all columns:

```
SELECT *  
FROM `homie`
```

however when i select specific columns using:

```
SELECT id, forex, currency, buying,selling  
FROM homie ;
```

and other variations of the same, I get the following error:

```
(mysql): SELECT id, forex, currency, buying,selling FROM homie ;
```

Error (0):

No data available.
