## Read fields with hyphen

Posted by amheng5 - 2015/07/28 16:54

---

I have a SQL DB that has a field name with a hyphen. I'm trying to get an error due to not knowing the correct code to enter

jml\_jshopping\_order\_status.name\_en-GB,

I've tried and Quotes, but no luck. I keep getting 1064 error.

Any advice will be appreciated.  
Thanks

Hello,

Try the following:

`jml\_jshopping\_order\_status`.`name\_en-GB`

Regards,  
ARI Soft
