
PDF language format

Posted by doukas - 2015/08/14 07:46

Hello,
I purchased ARI DATA TABLES and i would like to let you know that i am completely satisfied with your product.

However i am having a problem with the character encoding of the extracted pdf. The Greek characters are displayed as ???, while the English characters have no problem. Also when extracting in csv or excel format the Greek characters appear correctly.

I use:
table type: Ari Data Table
source type: SQL

Thanks in advance

Hello,

Do you show data from an external database or Joomla! database?

Regards,
ARI Soft

Hello,

The data is from joomla database (utf-8 general ci)

Thanks

Export features for "ARI Data Table" widget ("Choose table type" parameter is set to "ARI Data Table") supports only with English characters.
