Remove single quote of $ _REQUEST variables

Posted by vuck - 2015/09/01 03:29

_____

When the variables $ _REQUEST is printed inside the SQL statement, it is enclosed in "single quotation marks".
Can I change the code to a file and not the variable is printed in "single quotation marks"?
Regards,
Roberto

_____

Hello,

Values of request variables are quoted for security reason. If you want to change this behaviour, see the following code
in /modules/mod_aridatatables/includes/kernel/DataTables/Models/class.DataTablesDataSqlModel.php file:

AriArrayHelper::walkRecursive($request, array(&$db, 'Quote'));

comment or remove this code.

Regards,
ARI Soft
