## obsolete HTML properties cellpadding, cellspacing

Posted by atexo - 2015/09/09 08:17

---

Hi guys,

i love this flexible data table tool and use it very often on my site. However, one thing is puzzling me. Looking into the HTML source code of a page, using data tables, each table has the HTML properties cellpadding , cellspacing , border. As far as i know IE >8.0 and HTML 5 don't support such tags any longer. In some site analyzers this lead to Errors or at least Warnings (<https://validator.w3.org>). I think using this properties is basically fine, but it should be in the css way (style="....").

I didn't find a way to workaround this issue. Can you tell me, how i can fix this issue or do you intent to change this in an upcoming version?

Thanks  
Atexo

Hello,

Upgrade the extension to the latest version.

Regards,  
ARI Soft

Thanks for this quick change!  
I checked it immediately....Sorry, but you missed the "Border" tag. Maybe you can skip this attribute in an upcoming version as well.

Thanks  
Atexo
