
No Data Available

Posted by shabbaranks - 2015/09/21 11:08

Hi,

Im trying to get an additional import from a CSV file to work - 1 which I set up a while ago works fine where as this one I am working on displays no data available.

I can open the csv fine within Excel - the top of the spread sheet contains file headers and I have set this so within CSV - Heading (set to yes).

Any other thoughts what would cause this not to display?

Thanks

=====

Hello,

Could you send the CSV file and screenshot(s) of module settings page by email so we can investigate the problem?

Regards,
ARI Soft

Set "CSV -> Auto detect" parameter to "No" and "CSV -> Enclosure" parameter to ' value.
