## Joomla 3.4.4 breaks module

Posted by Bhaskar123 - 2015/10/09 22:17

---

<http://www.ari-soft.com/images/fbfiles/images/t1.png> Hi,

Joomla offered to upgrade to 3.4.4. After applying this, the module editing screen has spurious tabs, and I'm not able to save any changes. When I press "Save" it gives a message saying module change shave been saved, but it still contains old information. I attached a screenshot of the editing screen.

Anyone seen this?

Thanks!

Hello,

Check that you use the latest version of the extension (1.15.2).

Hello,

Download the latest version of the module in "Member Area" on our site and upgrade it on your site.
