Query does not run

Posted by egimen25 - 2015/10/10 04:29

_____

Ari data table 1.15.2 in Joomla 3.4.4 does not run the following query:

```
SET @numero=0;
SELECT @numero:=@numero+1 AS `POS`, `OFENSIVA`.*
FROM `OFENSIVA`
```

This consultation allows the results to number (Number the registration) of a SELECT in MYSQL but not running on ARI DATA TABLE, I appreciate your feedback as indicated.

_____

Hello,

Use the following query:

```
SELECT @numero:=@numero+1 AS `POS`, O.*
FROM `OFENSIVA` O,(SELECT @numero:=0) T
```

Friends, that arrangement requires consultation provided for you so there is no duplication of registration. Annex screenshot.

The last line of the query add to rank fields based on the AVE (averague) and VB (times at bat)

I appreciate your help if possible.
