
Translate title of column

Posted by rootKit - 2015/10/21 05:01

Hello!

Help me please, how to translate column title? in database only?
Image in attach

Thank's http://www.ari-soft.com/images/fbfiles/images/column_title.png

Thank you. It is possible to use "Columns settings -> Alias" parameter to change a column name. For example if want to change name of product column to Product Name, set "Columns settings -> ID" parameter to product value and "Columns settings -> Alias" parameter to Product Name value.

Regards,
ARI Soft

Thank's!

How to hide a field in which there are no values? or you can write a condition in which some of the fields will be hidden?
For example, if value = no -> this column to hide

Thank's
