Hello,

"ARI Data Tables" is compatible with Joomla! 3.4.5. v. 3.4.5 contains security fixes for Joomla! system. These fixes are not related to 3rd party Joomla! extensions.

If Joomla! v. 3.2.0 - 3.4.4 is installed on your site (with or without "ARI Data Tables" extension, it doesn't matter), upgrade it to Joomla! 3.4.5 to protect your system.

Regards,
ARI Soft
