
[SOLVED] How to use LIKE in mySql?

Posted by Krx - 2015/11/17 13:10

Hello

How to properly write LIKE syntax if I want to display all rows where mycolumn contains specific phrase?

I tried examples from here: <http://stackoverflow.com/questions/2602252/mysql-query-string-contains>

But module always throws error.

I guess that I need ARI specific escaping?

Thanks,
Regards

Hello,

What query do you use?

```
SELECT
id,
b_ref_id,
add_date,
last_modified_time_stamp
FROM
vit2_rpl_properties
WHERE
description_hr_hr
LIKE
%{$MsoNormalTable}%
```

"MsoNormalTable" is phrase which I'd like search for

This query is an incorrect. For example if you want to search 'Sample phrase' string, the query will look like:

```
SELECT
id,
b_ref_id,
add_date,
last_modified_time_stamp
FROM
vit2_rpl_properties
```

WHERE
description_hr_hr LIKE '%Sample phrase%'

Hi

This worked.
Thanks a lot :)

Best regards
