
Format: Color depending on value sign

Posted by tyner - 2015/12/04 10:02

First of all really great extension !!!!

I have a column which can be negative or positive and would like to format it as below:

- If the column value is >0(positive), add a "+" to the value and set color to GREEN: Example +3.55
- If the column value is

Hello,

The extension doesn't support this ability.

For example if want to change color of the second column in the 3rd row, set "Advanced styling" parameter to "Yes" in module settings and add the following code to "CSS Styles" parameter:

```
{ $id } TBODY TR.ari-tbl-row-2 TD.ari-tbl-col-1 {color: red;}
```

If want to change color in the second column in all rows, place the following code to "CSS Styles" parameter:

```
{ $id } TBODY TD.ari-tbl-col-1 {color: green;}
```
