
Parameter Use the plugin

Posted by airportrun - 2015/12/16 21:52

it is possible to utilize parameters in plugin?

```
{aridatatables moduleId="143" par1="5"}{/aridatatables}
```

```
sql:  
select * from xyz  
where a = {par1}
```

=====

Re:Parameter Use the plugin

Hello,

"Content - ARI Data Tables" plugin doesn't support this ability, but it is possible to override module parameters with help of "Module Plant" or "Modules Anywhere" 3rd party plugins.

Regards,
ARI Soft
