use of ARI data tables Posted by Leif_e - 2016/03/06 11:22
Hi
I have a question regardding ARI data tables
I have a memberlist in a seperate datatable in joomla with aprox. 1000 records
Can I create a table with a filter with fx name and adress and then only the members who has paided there anual fee?
Is it possible to export fx to an excel file or simular?
Best regards Leif

Hello,
It is possible to use request variables in "WHERE" clause of SQL query. For example a HTML search form can be placed in one article and the module in another article and send data from the form to the module.
Regards, ARI Soft
