JSON error editing mod_aridatatables

Posted by fdinkler - 2016/11/13 13:57

_____

Purchased/installed most recent version on Nov 12. Configured using a simple SQL statement, but the article never rendered (500 error.)
I increased timeout in php.ini and reran, but module still hanging.

Turning on DEBUG, and attempting to edit module in back end threw this error:

Error

A parse error has occurred while processing the following JSON data:

_____

Hello,

Log which you provided contains errors from 3rd party extensions, not from "ARI Data Tables". Could you provide a
temporary access to your Joomla! backend by email so we can investigate the problem?

Regards,
ARI Soft
