Hi,

No matter what I do the module will not display. I have placed in a module position and also in a article. These are the settings I have:

 http://www.ari-soft.com/images/fbfiles/images/Untitled_2.jpg
 http://www.ari-soft.com/images/fbfiles/images/Untitled_3.jpg

Here is the file I want to use (a test file)

what am I doing wrong? Any help will be highly appreciated.

Hello,

Use "csv/test.csv" value instead of "/csv/test.csv" in "Path to CSV file"
parameter. In other words remove leading slash. In your case it tries to
read CSV file from root folder of the server. Usually it isn't the same
with Joomla! root folder.
