
Problem loading one table

Posted by eoltra - 2016/11/22 20:45

Hi

I've been recently using ari datables with no problem at all. But this week I inserted a new table in my website and it appears this error

Strict Standards: Non-static method AriKernel::import() should not be called statically in
/var/www/anfi.cl/public_html/anfi/modules/mod_aridatatables/mod_aridatatables.php on line 20

it appears the same message problem in line 81,24,25 etc

What seems to be the issue?

Now i have unpublished the module for the moment.
Im using a SQL query connect to the Joomla database

Thanks

=====

Hello,

Do you use the latest version of the module (it is available in "Member Area" on our site)?

Regards,
ARI Soft
